

AxePort Pro™ USB Direct Box

Compact Pro Audio Innovation

AxePort Pro is a rugged, portable USB direct box. Plug in your guitar or bass, and you're ready to record to a Mac or PC. *AxePort Pro* packs all the features you'd expect from a bulky audio interface inside a compact preamp that easily slips into your pocket, or guitar case.

Road-Worthy Studio Quality

AxePort Pro was built to withstand road use while delivering professional quality audio. Housed in a rugged, anodized aluminum chassis, *AxePort Pro* offers the sound quality you'd expect in a studio product.

Pro Features in Your Pocket

AxePort Pro features a low noise guitar/bass preamp and headphone output with zero latency monitoring, designed to be loud across a variety of headphones. Conveniently located gain and volume control knobs make precise adjustments a breeze. Add bus power and amp modeling to its pocket-sized form, and you've got a USB direct box that will have you recording that killer riff in no time.

By Musicians, For Musicians

AxePort Pro was specifically designed with musicians in mind. Setup is virtually non-existent, allowing you to create a mobile recording rig anywhere a computer is available. *AxePort Pro* is great for the on-the-go musician that needs high quality recording with minimal headaches, just like its sister product, *MicPort Pro*, a USB microphone preamp, perfect for singer-songwriters.

Complementary Software

- CEntrance Universal Driver™—allows for multi-track recording with multiple *AxePort Pro*'s or will enable you to use both your *AxePort Pro* and *MicPort Pro* simultaneously
- REAPER™ multi-track recording and editing software (trial version, web download)

Features

- 24-bit/96kHz performance
- USB bus-powered
- Loud stereo headphone output
- 6' (1.83m) low-noise, shielded USB cable
- Instrument preamp gain knob
- Headphone volume knob
- Rugged, anodized aluminum chassis
- Windows XP and Vista compatible
- Mac OS X 10.4+ compatible

Connections

- Hi-Z 1/4" instrument input
- 1/8" stereo headphone output
- USB 1.1 and 2.0 connectivity
